

100% zero waste

100% COMPOSTABLE & BIODEGRADABLE CASE

100% recycled paper

Let's create a zero-waste world!

Forcell Zero Waste Case provides high protection against scratches and during occasional drops, while being 100% environmental friendly - can be even thrown out to your garden compost!

Why Eco-Thinking is so important

- Every year we produce over 300 million tons of plastic (6 million of them goes to the seas)
- 50% of packages is produced for single-use items.
- Almost every piece of plastic that's been ever created still exists

For: iPhone X/XS

Material facts on the back of the package

Forcell Zero Waste Case is the first in our offer, 100% compostable and biodegradable case, which you can throw away even in your own garden. We created it for the natural environment, which is more and more degraded by humans.

One person might not change the whole world but many individual person already do - let's take the zero-waste world challenge together!

The growing material needs that we generate cause that we have to oppose the culture of mass consumerism. Social responsibility requires decisive action so that future generations can enjoy the same land as we do.

Let's take the zero-waste world challenge together!

Wear your own cup and cutlery. When ordering dinner you will not need to the plastic one.

Talk with friends how to be environmental friendly. Many people do not behave ecologically because they do not know what they should change in daily routine.

Pack your food in lunchboxes. Thanks to them you will not only keep the products fresh, but also minimize the amount of plastic bags used to pack meals.

When shopping, read labels and choose products in recyclable packages. Milk from a glass bottle tastes just as good and Forcell Zero Waste Case you can throw in your own garden!

Go shopping with your own bag. Instead of plastic bags, put on a canvas or upcycling bag.

Share with us how you realise the idea of zero-waste world in your life: info@forcell.pl
