Protect your screen

with Forcell foils

No compromise for quality — only complete protection.
Five types of foils will meet different daily needs.
See how Forcell can change how you take care
of your phone's display.

Forcell Clear

- **Transparent**
  — the crystal coating preserves the original quality of the display.
- **Damage-resistant**
  — reduces the risk of scratches.
- **Invisible**
  — thin, undetectable to the touch.

Forcell HD

- **Clear**
  — provides excellent image quality and color.
- **Damage-resistant**
  — reduces the risk of scratches.
- **Invisible**
  — thin, imperceptible to the touch.

Forcell Privacy

- **Privatizing**
  — prevents the screen from being viewed by other people.
- **Matte**
  — reduces smudges and fingerprints.
- **Ultra-thin**
  — the extremely thin structure is not perceptible to the touch.

Forcell Matt

- **Anti-glare**
  — provides better screen visibility in bright light.
- **Dirt-resistant**
  — protects against fingerprints.
- **Pleasant to the touch**
  — matte finish improves user comfort.

Forcell Nano 7H

- **Hybrid**
  — combines the flexibility of foil and the strength of tempered glass.
- **Flexible**
  — more resistant to breakage than traditional tempered glass.
- **Durable**
  — effectively protects against scratches and the impact of falls.
